Art Unit: 1755

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

At page 1, line 6, of the specification after "2002" insert --now US Patent 6716281, 06 April 2004--.

In claim 24, line 1, replace "composition" with --process--.

This amendment merely corrects an obvious typographical error and does not materially affect the scope of the instant claims

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest contacting a copper surface roughened by contact with an adhesion promoting composition of oxidizer, pH adjuster and topography modifier with the sulfur containing compounds of claim 1. The explicit requirement of contacting said roughened copper surface excludes treatment of "black oxide" materials such as the process of US 5861076. The recited limitation in claim 35 of *providing* a clean copper surface and then contacting said clean copper surface as a definite method step is construed as excluding processes wherein the contact of the adhesion promoting composition and a clean copper surface is incidental such as incidental formation of clean copper areas during treatment with said adhesion promoting composition. The prior art fails to teach or suggest adding the thiol compounds of claim 41 to a copper surface adhesion promoting composition comprising an oxidizer, pH adjuster and topography modifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
